RCD REHMAN COLLEGE OF
DENTISTRY

Scan to Visit Website

Established in 2016, RCD is recognised both nationally and internationally as a reputable dental school for both undergraduate and post graduate dental education. RCD has produced excellent results in both undergraduate KMU professional exams and in postgraduate CPSP exams, where our students compete with students from other colleges. This is due to hard work put in by the faculty and commitment on the part of RCD administration.

A well-established DME at RCD overlooks the curriculum delivery and suggest improvement in MITs, assessment modes and curriculum plan to update and keep the highest levels of dental teaching and learning.

Lab facilities in both RMC and RCD are at the disposal of the students in the preclinical years. Latest equipment in these labs, in the best of the ambience, allows the students to thoroughly focus on their learning and training. A well active Phantom Head Lab allows the students to learn and polish their psychomotor skills in the preclinical years before getting exposure to the patients in the clinical wards.

At RCD, the students are evaluated in both theoretical and lab/clinical skills during the four years of undergraduate teaching. Students are assessed after every module, in the mid-session and end of session ensuring that they keep the highest level of didactic and practical/clinical skills. An active student affairs department regularly keeps the parents updated on their children's progress and are called for meetings with the teachers to address any concerns / queries on their part. Regular feedback from the students by the Department of QEC allows us to improve the standard of curriculum delivery and points out any deficiency on the part of the faculty/administration. Students of RCD are supported by a state-of-the-art General Hospital (RMI) where the students get exposure to a myriad of diseases which are of concerns for the dental graduates as well. They are taught and trained by a team of qualified and experienced consultants of RMI.

VISION

GOVERNANCE

The Principal is the administrative and academic head of the college and is directly responsible for day-to-day implementation of policies and plans of the institution in accordance with the guidelines of PMDC, KMU, and other relevant regulatory authorities.

Management Committee

The Management Committee is the governing body of the college and is constituted according to the guidelines of regulatory authorities.

Management Committee is responsible to:

- Develop and approve policies, procedures and plans to manage the college and teaching hospitals in accordance with rules and regulations set forth by PMDC, KMU and other regulatory authorities.
- Provide leadership and direction to implement the mission and goals of the college.
- Steward college resources efficiently, oversee and maintain financial integrity.
- Monitor policies for delivery of quality education.
- Advise and instruct in administrative matters directly or by investing authority and assignment of specific tasks to individuals or committees.
- Act as Appellate Authority.
- Consider or direct other relevant matters.

Academic Council / Board of Studies

The Academic Council is comprised of all Heads of the teaching department and Professors of the college. The principal of the college chairs the Council. It functions as a Supervisory and Oversight body.

The Academic Council determines institutional academic policies & curricular delivery techniques. It is responsible to determine and provide scenarios and appropriate patient access with clear objectives in each discipline.

BACHELOR IN DENTAL SURGERY (BDS)

A didactic indigenous integrated modular curriculum is built in alignment with PMDC guidelines. The course is paired with diverse clinical experiences and research and scholarly opportunities, providing students with knowledge and skills needed to be practice-ready after graduation. The students will also develop an appreciation for continual learning and improvement throughout their careers, setting them up for success in one of the most rapidly advancing healthcare sectors. The Phantom Head Laboratory and Clinical Skills Centre train students utilizing customized models, mannequins, simulated patients, and other training materials.

Thorough clinical experience is a characteristic of Rehman College of Dentistry's BDS program. The diversity of patients in clinics allows unmatched opportunities for hands-on experience in treating patients. Because of the high volume of patients, clinical students work closely with them, building long-term doctor-patient relationships.

Research is an integral part of RCD, and it has a well-established research unit headed by PhD faculty. The unit functions smoothly and maintains high quality to promote and facilitate research at both undergraduate and postgraduate levels. The Research Unit is involved in teaching research curriculum for all four years of BDS. Regular seminars and an annual Research and Innovation Summit and International Conference with multiple relevant activities allow students and faculty to develop linkages and collaboration with the dental community across the country.

To enhance the research culture, RCD launched its official peer-reviewed journal, JRCD, which has been publishing quality research since 2020 and is in the process of indexation. An intensive internal assessment program by the QEC enables the evaluation of student competence.

As part of continuous learning RCD encourages electives in the following Sub-specialties:

- Research
- Implant Dentistry
- Dental Emergency Management
- Rotary Endodontics
- Maxillofacial Surgery
- Maxillofacial Prosthesis
- Dental Radiology
